Declaration

I hereby declare that the work presented in this thesis is entirely my own and that I did not use any other sources and references than the listed ones. I have marked all direct or indirect statements from other sources contained therein as quotations. Neither this work nor significant parts of it were part of another examination procedure. I have not published this work in whole or in part before. The electronic copy is consistent with all submitted copies.

Zaragoza (Aragón), November 2023

Abstract

This is justified text.

1

Introduction

This is an introduction. **this is bold** *this is italic text*

This is [Glossary item 1](#) and this is [Glossary item 2](#).

Citation here^[1]. Footnote url here¹.

Another footnote simple².

²this is a footnote

2

Another chapter

This is a chapter.

Figure 2.1: Prism drawing

Second page.

Footnote url here with header³.

$$f = 28 \cdot \sqrt{(B_{DC} + (N_y - N_x) \cdot 0.86 \cdot 10^6 \cdot 4\pi \cdot 10^{-7}) \cdot (B_{DC} + (N_z - N_x) \cdot 0.86 \cdot 10^6) \cdot 4\pi \cdot 10^{-7}}$$

Equation 2.1: Theoretical Kittel equation expanded for a Permalloy thin-film for X-axis

$$f = 28 \cdot \sqrt{(B_{DC} + (N_y - N_x) \cdot 0.86 \cdot 10^6 \cdot 4\pi \cdot 10^{-7}) \cdot (B_{DC} + (N_z - N_x) \cdot 0.86 \cdot 10^6) \cdot 4\pi \cdot 10^{-7}}$$

This line is a comment in boxed formula

Equation 2.2: Theoretical Kittel equation expanded for a Permalloy thin-film for X-axis

$$f = 28 \cdot \sqrt{(B_{DC} + (N_y - N_x) \cdot 0.86 \cdot 10^6 \cdot 4\pi \cdot 10^{-7}) \cdot (B_{DC} + (N_z - N_x) \cdot 0.86 \cdot 10^6) \cdot 4\pi \cdot 10^{-7}}$$

Equation 2.3: Theoretical Kittel equation expanded for a Permalloy thin-film for X-axis

2.1 Section here

This is a new section.

| Item size1 (nm) | Item size2 (nm) |
|-----------------------|-----------------------|
| 8 | 600 |
| 10 | 400 |
| 12 | 300 |

Table 2.1: Sample table

Figure 2.2: Disc sample figure

| Item one (m) | Item two (m) | Item three (m) | Item four (m) |
|--------------------|------------------------------|----------------------|---------------------|
| 8 | $15000 \times 800 \times 60$ | 7.5413550 | 0 |
| 10 | $15000 \times 450 \times 60$ | 9.4630770 | 0 |
| 12 | $15000 \times 350 \times 60$ | 10.368898 | 0 |

Table 2.2: Table with complex cells

³<http://google.com>

| <i>Item size</i> (μm) | <i>Object</i> (m) | <i>Object width</i> (nm) | <i>Current</i> (mA) | <i>Gap @ 500nm</i> (nT) | <i>Gap @ 1μm</i> (nT) |
|---------------------------------------|----------------------|-----------------------------|------------------------|----------------------------|--|
| $15 \times 0.800 \times 0.06$ | 259.07 | 300 | 1.61000×10^4 | 51.66902 | 29.08373 |
| | | 400 | | 50.82305 | 28.93193 |
| | | 600 | | 48.54992 | 28.49336 |
| $15 \times 0.450 \times 0.06$ | 224.42 | 300 | 2.37000×10^4 | 76.05934 | 42.81274 |
| | | 400 | | 74.81401 | 42.58931 |
| | | 600 | | 71.46784 | 41.94378 |
| $15 \times 0.350 \times 0.06$ | 229.52 | 300 | 2.64000×10^4 | 84.72435 | 47.69013 |
| | | 400 | | 83.33715 | 47.44119 |
| | | 600 | | 79.61009 | 46.72226 |

Table 2.3: Complex table 2

Important note: This is a nice ToDo note.
